Cancer Cure Found?

CANCER CURE FOUND?

"I'm Not Sayin This Stuff Works... I'm just sayin..."

Since this is the end of Breast Cancer Awareness month, I would like to delve into the subject of cancer "awareness." In this modern era, no disease has been more infamous than cancer. The statistics are astounding. It has [been projected](#) that by the end of this year there will be **1,596,670 new cases and 57,1950 deaths** from cancer by the end of this year.

So far, the only thing that the pharmaceutical companies have been able to offer us is chemotherapy and radiation treatments. And these treatments are [not very effective](#). As a matter of fact, in many cases they are [less effective than a placebo](#). But nevertheless, this is the best that we have.

Now, with every problem, comes an opportunity. So of course, a whole lot of **"snake oil"** salesmen have arrived on the scene, tricking unsuspecting people into believing that they can cure cancer without drugs. That's where the F.D.A. comes in. It is their job to **stop all of these quacks from harming people**.

A classic example of this is the story of [Jim Navarro](#)

After all... The American Cancer Society (which states that they will **disband** if a cure is ever found) collects over 400 million dollars in donations every year to fight this "War On Cancer". That money is **NEEDED** in the quest to find a cure for this deadly disease. That money can't be stopped because of something... unscientific.

Anyway, there are a lot of "**scams**" out there in particular when it comes to cancer, so today I want to focus on one in particular, and then I will make mention of others.

Dr. Royal Raymond Rife

Let's talk about a man named Raymond Rife (May 16, 1888 – August 5, 1971). Raymond Rife was a scientist and an inventor. He invented technology (still used today) in biochemistry, ballistics, radiochemistry, electronics, aviation and optics. Over his career, he received 14 awards from the U.S. Government and was given an honorary medical doctorate from the University of Heidelberg. After studying at John Hopkins University he developed the first microscope in 1920 and by 1933 he developed the first universal microscope. The universal microscope was the first and only microscope that was able to view live viruses! He was able to do this by shining a light wave on the virus that resonated at the same frequency as that virus. Raymond Rife went beyond this and identified a virus that causes cancer and named it 'Cryptocides Primordiales'. This same virus years later (1948) was later on renamed Progenitor Cryptocides by Virginia Livingston, who was a frequent visitor of Rife's lab and took credit for discovering this virus.

Rife then took it a step further. By using the same wavelength that made these viruses visible, but by increasing the intensity of it, the viruses would oscillate faster and faster until they would **distort and disintegrate**. This could be done without harming any of the surrounding cells This is the same way you can shatter glass without hurting anything else around it by hitting an intense note that resonates on the specific frequency of that glass. Rife also discovered frequencies that could destroy many other diseases like polio, spinal meningitis, tetanus, influenza and herpes.

Shortly after Rife went public, The University of Southern California appointed a research committee (which included many doctors and pathologists, including **Dr Milbank Johnson** (the current president of the Southern California American Medical Association), and **Isaac Kendall** (the Dean of Northwestern Medical School) to bring terminal cancer patients to Rife's San Diego laboratory from the Pasadena County Hospital and examine Rife's electronic therapy.

After 90 days of the therapy, the research committee concluded that 86.5% of the patients had been completely cured. And to take it a step further, they adjusted the treatment and the other 13.5 of the patients were cured in the next 4 weeks. Yep... 100% of the patients were cured, and with **no side effects whatsoever**.

This was big! The story ended up on the front page of the San Diego Evening Tribune

House Forces Vote on Wage-Hour Bill

DREAD DISEASE GERMS DESTROYED BY RAYS, CLAIM OF S. D. SCIENTIST

Petition O. K.'d In Scramble By Solons

WASHINGTON, May 6 (A.P.)—House members completed a petition today to force Senate consideration of the proposed wage-hour bill.

Apparatus of San Diegan Seen as Poon to Medical World

Cancer Blow Seen After 18-Year Toil by Rife

Discovery that disease organisms, including one occurring in dread cancer, can be killed by bombarding them with radio waves issued in a particular length for each kind of organism, was claimed today by a San Diego scientist, Royal Raymond Rife, Ph. D.

Major Clinical trials began all over the world. The F.D.A. approved this revolutionary therapy, Cancer was eliminated as a threat to society and everyone lived happily ever after.

Yes... Positive thinking is wonderful, and makes you feel great inside doesn't it?

So now let's get back to the REAL story.

Morris Fishbein, the head of the American Medical Association tried to buy Rife out (the same way he tried to buy out Harold Hoxsey - another man who had cured cancer - see below), but Rife refused. After that, strange things began to happen. Records, film, and photographs from Rife's lab began to slowly disappear. Nobody ever found out who was doing it.

Now, from 1934 to 1939, doctors all over America began to cure diseases using the Rife Machines. But the American Medical Association and drug companies began to pressure them (as well as Rife) to stop and eventually they shut them down (often going as far as to bribe people within organizations to cause dysfunction).

Also, the Burnet Lab located in New Jersey where Rife's work was independently being validated was **burned down by arsonists** right before the scientist there were about to confirm Rife's work. Then, someone vandalized Rife's microscopes (pieces of his universal microscope were taken). Dr. Nemes, who duplicated some of Rife's work in a lab about 40 miles from Rife's lab was **killed in a fire** that burned his lab down completely. After that, the police **illegally confiscated** the remainder of Rife's research (50 years worth) and Raymond was pretty much shut down at that point.

Then in 1939 Philip Hoyland was **bribed** to file a frivolous lawsuit against his partners in

the Beam Ray Corporation (the only company that was still manufacturing the Rife Machines. Hoyland lost the suit, but the legal expenses bankrupted the company and the commercial production of Rife's frequency instruments stopped.

But that wasn't the end of it. Dr. Milbank Johnson (who had worked with Rife) refused to be silenced on this issue. In 1944 Dr Milbank was planning on holding a press conference to announce how Rife's technology had worked. But shortly before he made his announcement, he died of what was reported as a "brief illness." Years later, federal investigators exhumed his body and **detected poison**. More "incidences" and threats occurred. Doctors (many of which had been photographed honoring Rife at a banquet) now claimed that they had never met Rife.

Then Rife's closest associate, Isaac Kendall took a \$200,000 bribe and r... oops. I mean... Isaac Kendall accepted a \$200,000 grant, **went to Mexico and retired**. Rife tried many times to resurrect his work, but he was harassed until he gave up and fell into depression. He spent the last part of his life as a heavy drinker until he died of an overdose of Valium. This overdose was not self administered.

Over a period of years, some of Rife's colleagues reconstructed enough of his work (even some from burned papers) to make effective Rife Instruments. Rife technology became available again in 1986 along with the publication "[The Cancer Cure That Worked](#)" by **Barry Lynes**.

And of course today, you can still buy Rife Machines. **Now... I'm not saying buy them. I mean, after all... This is not "FDA Approved."** And I'm not saying that there is a cancer cure conspiracy, but I'm just saying...

Other Notables On Cancer

The Hunza Diet

There is a small kingdom located in the Himalaya Mountains called Hunza. The Hunzakuts are known to **commonly live** beyond the age of 100. Some of them even live

to 120 or more. Now, because they live away from this westernized way of life, they don't eat all of the garbage and processed food that is eaten in America and they don't suffer from all of the ailments that we do.

But... What is astounding, is that when the Hunzakuts move away from there culture and into westernized societies and begin to adopt our lifestyles, they **succumb to the same ailments** and diseases that we do. This gives credence to a theory that I have been trying to sell the medical establishment for some time now.

"When you eat a healthy diet, it can strengthen not only your health, but your family's generational health (**past, present and future**). But when you eat garbage, your ancestors will retroactively become sick, and you will be subject to **hereditary diseases** and illnesses that **run in the family**. "

Anyway... What is also astounding is that medical teams from all around the world have visited the Hunzakuts and there has NEVER... Not even ONE case of **cancer** reported there. So if one wanted to look for a cancer cure, then maybe studying the [Hunza Diet and lifestyle](#) could help!

Along with not eating at places like SickDonalds, Taco Hell and "I Hope You Feel Lucky" Fried Chicken there is a very interesting aspect of the Hunzakuts diet. One of which is their use of **Apricots**. It is not uncommon for them to eat 30-50 apricot seeds after lunch. As a matter of fact, in this land... A person's wealth is measured by the number of apricot trees they own! Now why is this important? Apricots contain high amounts of a very controversial ingredient, That ingredient is...

Vitamin B-17

Dr Ernst. Krebs, Jr., PhD. was a biochemist in San Francisco. By 1952, Dr. Ernst had hypothesized that cancer was in fact a deficiency disease, like scurvy and pellagra, that was aggravated by the lack of an essential found compound in our modern day diet. That compound is Vitamin B17 (a.k.a. Laetrile). He was successful in treating many patients with this vitamin (which he derived from apricots).

The FDA, the AMA, and The American Cancer Society have labeled this fraud and quackery even though there are numerous case studies that show it's effectiveness. As a matter of fact vitamin B-17 has been **BANNED** from being used by doctors to cure this disease.

Any hospital that uses B-17 is in jeopardy of losing grants from the government. And any doctor who prescribes vitamin B-17 for any reason is required to have them fill out a form and send it to the FDA or he/she is in danger of **losing his/her license**.

Many health food stores in the past were **raided** and had to give up their supplies of B17. This was because the B17 was near books that claimed that the B17 was the answer to cancer. Most health food stores don't even carry Vitamin B-17 at this point.

However you can still purchase vitamin B-17. You just can't sell it if you are claiming that it is a cancer cure. Some great sources of vitamin B-17 are apricots, wheat grass, and apple seeds.

A More Comprehensive List Of Sources Is [HERE](#).

More Info on vitamin B-17

Watch Edward Griffin's 55 Minute Documentary **A World Without Cancer** in the [Infotainment Section](#) of This Website (scroll down to the bottom under Health). From there you can also be led to a place where you can purchase B-17 if you please.

Now... I'm not sayin that this works... but I'm just sayin.

Dr. Johanna Budwig

Johanna Budwig (30 September 1908–19 May 2003) was a German biochemist and author who was nominated for 7 Nobel Peace Prizes for her work. Dr. Budwig has a Ph.D. in Natural Science. She has also been trained in physics, biology, botany and pharmaceutical science. Doctor Budwig found that without exception, all cancer patients had a common deficiency. This deficiency was **Omega 3** and Omega 6 fatty acids (EFAs which are [oxygen magnets](#)). Now, a lot of doctors had tried to treat patients by giving them Omega 3 sources, but none had been consistent.

Dr Budwig found that the best way for these fatty acids to be fully available to the body, is to be tie them to a sulfur based protein. And the best that she found was cottage cheese. She developed a diet protocol based on this and she claims to have had a success rate of **over 90%**. She would have her patients take 3 to 6 tablespoons of flaxseed oil per day along with 4 oz - 1/2 cup of cottage cheese. The medical establishment has labeled this a quackery, but many individuals swear by her protocols.

Hey Hey Hey.... I'M NOT SAYIN THAT THIS WORKS. I'm just sayin.

Harold Hoxsey

Harold Hoxsey inherited an herbal formula from his great grandfather, who had developed this formula in 1840 after he watched his prize stallion **cure itself of cancer** by eating a variety of plants that the horse normally didn't graze on while in the pasture. This treatment wasn't effective on ALL cancers, but it was especially effective on cancers where visible on the surface

Morris Fishbein, the head of the American Medical Association tried to buy out Hoxsey and let him have a small percentage of the profits after 9 years (if it worked). When Hoxsey refused, the medical authorities (The FDA and the AMA) branded him a quack. Fishbein (who had political connections) had Hoxsey arrested **125 times in 16 months**. The charges (practicing without a license) were almost always thrown out, but the harassment drove him crazy.

Hoxsey sued Fishbein and was victorious. And this was one of the major factors of Fishbein eventually having to resign from his position with the A.M.A. But The FDA eventually shut down all of Hoxsey's clinics by 1960 (despite all of their successes). Hoxsey gave the formula to his daughter and she moved to Mexico and started a clinic that is still there today.

[The Story of Harold Hoxsey](#)

Hey... I'm not a "Doctor." so I am in NO WAY saying that this works. But I'm just sayin.

Dr. Hulda Regehr Clark

Dr. Hulda Clark received a Bachelor of Arts, Magna Cum Laude, and a Master of Arts, with High Honors at the University of Saskatchewan (where she began her studies in biology) in Canada. She studied for a couple of years at McGill University and then attended the

University of Minnesota where she studied biophysics and cell physiology. She received a doctorate in physiology in 1958. She began to do private research and consulting starting in 1979. she also received an unaccredited naturapathy degree from Clayton Collage of Natural Health.

Dr. Clark implicated **parasites and toxins** for there role in diseases. She developed a Zapper technology that was more effective in killing parasites than the normal herbal parasite formula (black walnut, wormwood and cloves). **Her invention is inspired by the inventions of Raymond Rife and Nikola Telsa** (who pioneered the field of electrotherapy). Many people swear by Dr. Clarks methods and there are a lot of different Zappers (**which are generally more cost effective than rife machines**) that are sold out there today.

Dr. Clark has [written many books](#) such as [The Cure for All Diseases](#), the Cure For All Cancers and The Cure for HIV and AIDS. Dr. Clark was run out of the U.S. by the FDA and now has a clinic "**The Pink House**" that operates out of Tijuana Mexico. Even in Tijuana, Dr. Clark has been harassed by Dr. Stephen Barrett (owner of Quackwatch) and at one point had her clinic shut down, but [it has now been reopened](#).

You can purchase The Terminator (**Zapper** by Don Croft) at [Oasis Advanced Wellness](#) by going to the **Tools For Health and Well Being** section. It's the zapper that I use. I've never had cancer, but I can attest to it's effect on my health (more energy, less sickness, better sleep).

[Who Is Dr. Hulda Clark?](#)

[Is Hulda Clark a Quack or a Hero?](#)

Hey... Wait a Minute! Stop It! You just Stop That! I'm not sayin that this method works. But I'm just sayin.

There are many other things that have been implicated (allegedly) in **helping** with cancer (you can do the research yourself). Black Cumin Seed Oil, Hydrogen Peroxide Therapy, Chorella, Vitamin D3, Tumeric, Ozone Therapy etc.

But of course... **These statements have not been evaluated by the F.D.A.**

This Blog is not intended to diagnose or cure any disease. If you need help, make

sure you see a physician first.

Because I AINT SAYIN THAT THIS STUFF WORKS!!! But I'm just sayin...
